Vapac Cleanable

The Eco-friendly Cleanable Cylinder

With Vapac cleanable cylinders it is simple for maintenance engineers to remove scale that collects at the bottom of humidifier cylinders and to clean the strainer, extending the operational life of a cylinder without compromising performance. By simply unfastening the quick release toggle clamps the cylinder can be quickly opened and just as quickly resealed.

A purpose designed Neoprene seal locates and aligns the cylinder halves to ensure correct assembly and a watertight seal.

Steel rings are located on the flange of each cylinder half, evenly distributing the clamping force and preventing the flanges from distorting – a problem commonly found with cylinders held together with bolts or clips.

The positioning of cylinder electrodes is critical to the accurate working of humidifiers; therefore electrodes are permanently fixed in the upper half of the cylinder. This makes electrodes superfluous as a spares item.

Vapac cleanable cylinders are fully interchangeable with Vapac disposable cylinders (excluding Size 5) and can be installed in existing or new Vapac humidifiers.

Features

- ✓ Opened and resealed in minutes.
- ✓ No fiddly screws or clips.
- ✓ Cylinder flanges cannot distort.
- ✓ Manufactured from recyclable materials.
- ✓ Interchangeable with disposable cylinders.

Specifying a Replacement Cylinder

The part number of an existing Vapac cylinder can be used to order an exact replacement or to change from cleanable to disposable or disposable to cleanable.

Cylinder Type
CM/CD – Disposable
CC – Cleanable*

CM/CD - 4N - 6WB

Cylinder Size
Used to replace existing cylinder

Use the appropriate prefix to order the cylinder type required.

E.G. **CD-4N-6WB** (Disposable Cylinder) Becomes **CC-4N-6WB** (Cleanable Cylinder)

*Cleanable Cylinder comes with rings and seal

Spare Parts

Cylinder Size:	1	1/2	2	3	4
Seal:		3910171		3910172	3910173
Annular Ring C/W Clamps:		M010117		M010119	M010121
Plain Annular Ring:		M010118		M010120	M010122
